Hello! Welcome to the world of Minecraft!

For students, Minecraft Official Genuine Edition may be too expensive.

The official also said that if players do not have the ability to support legitimate versions, they can use pirated versions first.

So, it's difficult for MCBE to find pirated launchers on the Internet, how can we play games for free?

There are many useful open source repositories on GitHub, and it is easy to find MCBE installation packages on the internet.
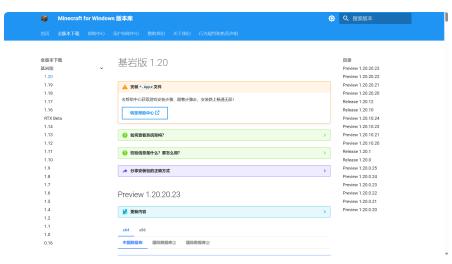

Below, you only need to follow this article to unlock Minecraft: Bedrock Edition for free.

Installation of MCBE body

At present, the Internet is full of good and evil people. It is difficult for us to find high–quality content in search engines, including the powerful Google Search search engine. Here, I recommend a website that can download MCBE to readers, but this website only supports Chinese.

Web page snapshot

Select the version you want and download and install it.

install program

The first startup may be slow, please be patient. When the author first opens a higher version of Minecraft, the progress will be blocked by 41%. Please be patient and wait.

After opening the game, you will find an option to 'unlock complete game' (translation may not be completely accurate), and we will close the game at this time.

We need to obtain the unlocking program from GitHub.

The author's operator's access to GitHub is somewhat unstable, so they do not provide webpage snapshots.

Click on "Code", "Download ZIP", and download the compressed package of the open source repository.

You will obtain a compressed package, then extract it, click on the folder → [MFWL] Minecraft For Windows10 Launcher, right–click on the "Unlock. bat" file, run it as an administrator, and then use any screen translation software to translate it into the language you are using.

Both options can be used, but make sure you remember the one you chose.

After the batch file runs, you can play MCBE freely.

Final Effect

It is recommended to log in to your Xbox account and enjoy playing with friends.

Login is free and you do not need to pay any extra amount.
